The **Centre for Pelvic Floor** provides diagnosis and management for most disorders of the female pelvic floor. This includes problems with voiding, urinary incontinence, pelvic organ prolapse, fecal incontinence, and sexual dysfunction. Dr. Cundiff offers non-surgical management and surgical options, including procedures that do not use surgical mesh. Dr. Cundiff also offers consultation for surgical complications, including complications related to the use of surgical mesh. He provides minimally invasive approaches to all gynaecologic surgical conditions.
